### WHY CHOOSE PET DELTA PETS TRANSIT?

#### USA requiring microchips for pet import.

The Thai Department of Livestock development is now requiring implanted microchips or ID tattoos for all dogs, cats and rabbits coming into, from or transiting US effective February 7, 2017.

#### Pet Moving Made Easy

You take your furry friend to the pet store so she can pick her own toys. Let Air Animal Pet Movers® make your upcoming move as easy as that trip to the pet play store. Air Animal is a rare find - we're veterinarian and family-owned and our pet moving experts are pet owners. We know you want only the best for your best friends.

#### International Travel

We also specialise in helping with overseas pet transportation. Each and every dog or a cat brought into Australia will require a permit. These permits are issued from the Department of Agriculture, Fisheries and Food.

#### Domestic Transport

You can feel safe in the knowledge that we will only ever use the most direct routes. You can feel safe in the knowledge that we will only ever use the most direct routes. This way your loved one will be delivered back safe to you with the minimum of fuss.

### Pet Travel Insurance

Coverage: Covers the expenses directly resulting from loss, theft and damage or death of the animal caused by external circumstances from the moment of delivery by the shipper (max 6. Hours prior to transport covered by the insurance) to the shipping agent or the airline till the moment of acceptance counter of the airline or its handling agent. This insurance does not cover damage or death caused by the animal/s itself or death due to natural causes.

## ABOUT US

[Home](#) / [About us](#)

### HISTORY OF DELTA PET TRANSIT

Holistically monetize empowered processes after leveraged resources. Phosfluorescently impact enterprise-wide platforms after future-proof niche markets.

Today, Delta Air Lines is one of the world's largest airlines, transporting 180 million customers to more than 330 destinations in 61 countries around the world and carrying more than 2.2 billion cargo ton-miles each year. However, when the airline was founded in 1924 in Macon, GA, its fleet of 18 planes was solely a crop-dusting operation. The airline quickly grew.

In 1934, when it received the Air Mail Route 24 from the United States Post Office, Delta Air Lines expanded services to include mail transportation. By 1946, it was a full-service passenger airline and had also started offering regularly scheduled cargo services. Throughout the next two decades, Delta continued to extend its reach by expanding internationally to offer service to the Caribbean and South America. The cargo operation continued to flourish as well.

In 1975, Delta became the first airline to offer its own air express service called Delta Air Express, which offered high priority, guaranteed cargo service. Delta continued to grow as a global carrier, beginning service to Europe in 1978 and Asia in 1988. This enabled the company to forge the first international cargo alliance with SwissCargo in 1998, followed by the SkyTeam alliance with partners AeroMexico, Air France and Korean Air two years later.

Delta acquired Northwest Airlines in 2008, creating a global airline with major operations in every region of the world. This global footprint has helped Delta continue its success. In 2014, the company generated over \$40 billion in revenue, with Delta Cargo revenue of \$934 million.

### International Travel - How it works

How does it work?  
I've never done this before.  
What happens to my pet during the process?  
Where do I begin?

If these questions sound familiar, please read through our step by step processes for a better understanding and an insight to the business of International Pet Transport. This is what we do, our business is your pets complete comfort and wellbeing. Pet Carriers offer first class service for your beloved furry family members. We understand that a little special attention and personalized service goes a long way in what can potentially be a stressful time for yourself and your pet.

#### Globally visualize standards compliant resources

Uniquely initiate clicks-and-mortar processes after resource sucking data. Quickly re-engineer diverse.

#### Collaboratively enable multidisciplinary value

Uniquely initiate clicks-and-mortar processes after resource sucking data. Quickly re-engineer diverse ROI.

<http://deltapettransit.com/about.html> 9/18/2017 10:14 a.m. (Part 1 of About Page)

## How it works!

### The Collection

Collection day is generally the day before flight departure. Your pet will be collected from your residence by one of our friendly drivers in the Pet Carriers van. Our drivers are experienced in handling many different pets with all different personalities. Please don't worry if you have a nervous pet, we will be able to calm him or her move the pet from house to van as safely as possible. Our driver will collect any relevant original vaccination cards or records relevant to the country of import. They will also collect any bedding/toys or special food should your pet have any dietary requirements.

### Final veterinary health check

Your pet will have a scheduled veterinary health check on the day of collection. This health check is to ensure your pet is free of any diseases and fit and healthy to travel by air the following day. The veterinary consult usually takes no more than 15 minutes. After the veterinary health check, your pet is delivered back to our facilities for overnight boarding.

### Overnight boarding:

We have proper boarding facilities at all major ports in Australia. We offer large runs for all dogs and a special enclosed cat room away from the potential noise of barking dogs.

### Walks and play time:

Whilst boarding with us, dogs are taken for a minimum of 2 walks per day. If time and weather permits, we like to take them more than twice. It is not uncommon for your dog to be taken to a special dog park or reserve to exert all of their energy pre flight. Cats have a chance to stretch their legs outside of their sleeping enclosure inside the cat room. We have lots of scratching posts and climbing bars.

### Pre-flight preparations:

After your pet has had a health check at the vet and settled in at our facilities, we will arrange collection of the export paperwork from Australian quarantine and airline documents relevant to the export. Your pets travelling crate will be prepared and made comfortable for the journey.

### Inside your pets travelling crate:

Inside your pets travelling crate we will provide newspaper and stay dry matting. If you have given our driver a special blanket or bedding for your pet, we will ensure this is included for ultimate comfort. All travelling crates are fitted with a water container. This can be topped up from the outside at any transit port and at the destination without having to open the door.

### At the airport:

It's another teary goodbye as we fill the water container and ensure your pet is comfortable and relaxed inside his/her travelling crate. From here the door is sealed shut with cable ties until your pet reaches their destination. The cargo handling agents will collect your pet in his/her travelling crate from the Pet Carriers van and load the travelling crate onto a forklift.

### Behind the scenes:

From here on, your pet is released from pet carriers and will be in the trusted hands of the specialist ground crew. Your pet will be taken 'behind the scenes' for x-rays, document processing and loading on to the aircraft. If we experience any hot weather, pets are taken inside the air conditioned cargo offices until the absolute last minute.

### On board the plane:

When your pet is loaded onto the aircraft, the travelling crate is secured in an area designated for live animals, away from the other baggage and cargo. The travelling crate is strapped down individually with netting so that no movement occurs during flight take-off and landing. The bulk hold is pressurised and temperature controlled. It is also dimly lit.

#### Comfort stops and transits:

On some journeys, pets may be required to transit through a different country. They may swap planes or remain on the same aircraft while it refuels. If your pet's transit is for an extended period, we can arrange for our representatives to provide a comfort stop. Your pets are offered the chance to come out of their travelling crates for a walk. Their crate is cleaned up and their water is refilled.

#### Arrival at the destination

##### airport:

Similar to the same processes at the departure airport, your pet will be offloaded the plane and will carry out these procedures in reverse. Pet carriers will supply you with details for collecting your pet at the destination airport. We often provide home delivery where our agents can arrange this collection on your behalf and deliver to your residence.

## Domestic Services

When faced with relocating a pet, we understand the value of feeling absolutely comfortable with the safety and comfort of your precious pets when seeking any long distance airport pet transportation. In order to make his or her trip just as comfortable and stress-free as possible, Delta Pet provide the extra care that each and every pet deserves, while providing you with the peace of mind knowing they are receiving the absolute best of care. Delta Pet is Certified as a USDA Intermediate Handler (No. 93-H-0091), and understands and abides by the strict guidelines of animal transportation.

Once you submit a request for an estimate, we assign a Pet Relocation Specialist, a professional pet transport and animal relocation expert who will contact you and work with you through your pet's relocation move.

### Each Specialist will:

- ✓ Arrange all air transportation needs
- ✓ Provide free estimates for pet travel either door to door, or airport to airport
- ✓ Make sure all international requirements are met including import permits.
- ✓ Provide dedicated individual service for you and your pets' relocation from start to finish.
- ✓ Provide door-to-door Pet Relocation Services – Meet your pet(s) at the destination airport and deliver them to your requested location. Arrange pet ground transportation door-to-door and to and from departure airport and arrival airport.
- ✓ USDA and airline approved flight kennels can be provided with personalized labels, identification and emergency notification instructions.
- ✓ Arrange kenneling and/or boarding at either end of your pet travel needs, if necessary.

Your pet's comfort and safety are our number one concern. Put our experience to work for you and your pet. Contact us today to obtain an individualized consultation for your pet transportation needs. Find out how truly stress-free pet moving can be with the professional services at Delta Pet Transit.

## MOVE PET INTERNATIONAL

Home / Move pet international

### International Services

While there are many steps in transporting your pet domestically, relocating internationally adds an additional level of complexity. Each country has their own requirements for pet importation, determined by the Minister of Agriculture of the country. Some countries require a lengthy quarantine, others have more rigid standards and some only accept pets at certain airports within that country. The most important thing to remember is, just like human travel, pets also need additional documentation in order to enter its desired country. Each country is different, and they all require their own documentation when accepting pets.

When you contract with Delta Pet you are assigned a Pet Relocation Specialist familiar with the full spectrum of regulations and legal requirements particular to every animal, destination and airline. We also make it our business to stay up-to-date with any possible changes in those requirements. An Delta Pet Specialist knows the safest and most efficient process to ship and receive your pet at its destination. They will work with your relocation schedule to ensure as smooth a move as possible and to arrange the fastest, most direct flight for your pet.

**Delta Pet Transit will handle all of the following:**

- ☒ Prearrange all necessary flights, ensuring a direct connection when possible. Work with your schedule as much as possible.
- ☒ Make sure that all necessary shots are current and that all paperwork is in place.
- ☒ Make sure all international requirements are met including import permits.
- ☒ Coordinate your pet's trip to ensure that you are informed of any requirements for quarantine of your pet or requirements for getting your pet through customs.
- ☒ Pick up your pet at your house and deliver him to the airport.
- ☒ Meet your pet at the destination airport and deliver your pet to your home.
- ☒ Arrange for kenneling on either end if necessary.
- ☒ Provide assembled travel kennels and/or extenders for Extra large and Giant crates and custom crates to ensure your pet's comfort.
- ☒ Keep in contact with you during your pets move and to answer all questions you may have.

Contact us today to receive a no obligation estimate to relocate your pet to its international destination.

# TRANSPORTATION BY ROAD

Home / By Road

## Transportation by Road

Delta Pet Transit provides a safe, reliable service for pet travel by road throughout Europe and the UK. Our couriers are experienced drivers and our vehicles are customised with comfortable travel compartments and security features. We aim to make pet road travel an affordable service while prioritising the animals' welfare and safety.

### On the Journey

Our pet couriers are trained and experienced animal handlers

- ☒ We have a range of custom-fitted vehicles, all with air-conditioning and/or electric airflow
- ☒ We provide appropriate accommodation for each type and size of animal – we'll ask you for your pet's dimensions and weight so that we can make sure it has a comfortable travel compartment.
- ☒ We follow a strict cleaning and disinfection regime
- ☒ Our journeys incorporate time to clean, feed and exercise the pets

### Scheduled or tailored road trips

PET TRAVEL BY AIR WORLDWIDE

Home / Pet Travel by Air Worldwide

### Pet Travel by Air Worldwide

Delta Pets can arrange pet travel by air for you. We can do as much or as little of the organisation as you want, to fit in with your personal travel plans, your budget, and your animals' needs. Complementary services include airport collection and delivery, quarantine services and boarding for your animal at either end of the journey

### Our air freight services

Accredited IATA cargo agent. This means we have partnership status with all airlines that provide pet air travel and offer competitive rates. Whether it's a direct flight or a more complex journey – say, from Spain to New Zealand via London – we can organise it for you. We can usually book pets onto the same flight as you, or on a flight that lands at a similar time, so that you can avoid an extra trip to the airport. We also offer airport collection and delivery services in the UK, France and Spain. We can provide an experienced animal courier to accompany animals on flights; or we can charter private aircraft for you and your pets.

Credibly facilitate emerging niches whereas user-centric "outside the box" thinking. Objectively deploy reliable communities vis-a-vis holistic web-readiness. Objectively deploy reliable communities vis-a-vis holistic web-readiness. The generated Lorem Ipsum is therefore always free from repetition etc.

Animals travelling by air must have a suitable travel box. We can provide standard plastic travel boxes or custom-made wooden travel boxes to suit all species, that meet IATA guidelines. We'll ask you for your pet's dimensions and weight so that we can make sure it has the right size travel box..

## Boarding and quarantine

We can organise boarding for your pet at either end of the trip, to bridge any gaps in dates. Whenever possible, this will be our own home boarding service or a kennels or cattery that we know and like. If your pet needs to go into quarantine in the UK, Animalcouriers can help you arrange quarantine accommodation and provide transport services. If your pet is waiting for its pet passport to become valid before entering the US, we can advise on other boarding options as a legal alternative to quarantine. Find out more about our quarantine services
